Дисциплина: Фронт-энд разработка

Отчет

Домашняя работа 2: доступность в HTML

Выполнил:

Ступичев Алексей Николаевич

Группа

J3210

Проверил:

Добряков Д. И.

Санкт-Петербург

2026 г.

Задача

Улучшить доступность ранее реализованного сайта. Добавить необходимые HTML-атрибуты ко всему контенту на странице и проверить это с помощью инструментов из Dev Tools браузера Firefox и сервиса Google Lighthouse.

100 Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

- Interactive controls are keyboard focusable
- Interactive elements indicate their purpose and state
- The page has a logical tab order
- Visual order on the page follows DOM order
- User focus is not accidentally trapped in a region
- The user's focus is directed to new content added to the page
- HTML5 landmark elements are used to improve navigation
- Offscreen content is hidden from assistive technology
- Custom controls have associated labels
- Custom controls have ARIA roles

98 Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAVIGATION

Heading elements are not in a sequentially-descending order

Properly ordered headings that do not skip levels convey the semantic structure of the page, making it easier to navigate and understand when using assistive technologies. [Learn more about heading order](#)

Failing Elements

HL, H2, H3, H4, H5, H6

These are opportunities to improve keyboard navigation in your application.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#)

BEST PRACTICES

Document does not have a main landmark

These items highlight common accessibility best practices.

ADDITIONAL ITEMS TO MANUALLY CHECK (10)

These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#)

77 Accessibility

There were issues affecting this run of Lighthouse.

- The page loaded too slowly to finish within the time limit. Results may be incomplete.

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

NAMES AND LABELS

Buttons do not have an accessible name

These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

CONTRAST

Background and foreground colors do not have a sufficient contrast ratio.

These are opportunities to improve the legibility of your content.

NAVIGATION

Heading elements are not in a sequentially-descending order

These are opportunities to improve keyboard navigation in your application.

Вот краткий разбор исправлений:

Элементы форм input, select, textarea не имели label. Они были добавлены

Кнопки не имели описания. Добавлены label с описанием действия.

Слабый контраст текста. btn-outline-secondary плохо читается на светлом фоне. Заменено на btn-secondary (и btn-danger для удаления).

В карточках курсов были h6 для текста. Поменяны на h3 или h4, где нужно.

Где то были неправильные теги, в одном был div вместо main.

Вывод

В целом исправления повышают доступность, делают кнопки и уведомления понятными для скринридеров и улучшают контраст для всех пользователей.
